

## Industrial Visit at ‘Bharat Electricals Pvt. Ltd.’, Ratnagiri

30<sup>th</sup> January 2020

Department of Electrical Engineering conducted one-day industrial visit to “*Bharat Electricals Pvt. Ltd. Ratnagiri*” on 30th January 2020. Total 20 students from second year electrical engineering, along with 01 faculty and 01 staff participated in visit. Bharat Electricals is a transformer manufacturing & repairing company, which is established in 1993 in Ratnagiri. Transformers up to 125kva are manufactured here. Also repairing and maintenance is carried out by company. Mr. H. A. Mukri, senior Engineer, explained in detail about transformer design including design of core, winding details like number of turns, area of conductors, type of winding, material & different types of transformer connections (star & delta). Students also enthusiastically asked their queries to the company workers.

Visit was fruitful and it will help students to bridge gap between theoretical and practical knowledge.
